

MACROKIOSK is looking for

Intern, Software Engineering (Malaysia)

Your roles and responsibilities:

- Develop new applications or new features to existing applications.
- Develop applications by organisation-established standards, architecture and practices.
- Produce well-organised, optimised, documented and version-controlled source code.
- Perform rigorous unit testing on developed code to meet quality metrics.
- Maintain and support existing applications.
- Debug and fix code issues.
- Participate in requirement specifications, design, testing and implementation.

What we need from you:

- Knowledge in web application development using ASP.NET.
- Good verbal and written English and Bahasa Malaysia communication skills.
- Personality traits – meticulous, pleasant, self-motivated, enthusiastic, result-oriented, responsible, independent, trustworthy, ethical and a team player.
- Knowledge of other languages would be an advantage.
- Possess a Degree in Engineering (Computer), Computer Science/Information Technology or its equivalent.
